INA-GNG
Neuropsychiatry Journal Club

Thursday 19 November 2026

21:00 CET · 20:00GMT · 15:00 ET · 14:00 Mexico City · 12:00 PT

Friday 20 November: **06:00 AEST (Brisbane) · 07:00 AEDT (Sydney)**

Adversarial testing of global neuronal workspace and integrated information theories of consciousness

Cogitate Consortium et al. | Nature (2025) https://doi.org/10.1038/s41586-025-08888-1

Presenter

Dr Orelli Ruiz Rodriguez, MD
Psychiatry Resident
Department of Neuropsychiatry
National Institute of Neurology and Neurosurgery (INNN)
Mexico City, Mexico

Chair

Dr Jasvinder Singh, MRCPsych, FRANZCP
Consultant neuropsychiatrist based in Brisbane, Australia, founder of the Global Neuropsychiatry Group, and Senior Lecturer at the University of Queensland. He trained in psychiatry in the UK and Australia. His clinical work focuses on the neuropsychiatric aspects of epilepsy, stroke, multiple sclerosis, functional neurological disorders, traumatic brain injury, movement disorders, and dementias, with a particular interest in neurodevelopmental disorders and intellectual disability.

The INA-GNG Neuropsychiatry Journal Club is a trainee-led forum to discuss exciting neuropsychiatric research & encourage international collaboration!

Expert Panel Members

Dr Jesús Ramírez-Bermúdez, MD, PhD
Psychiatrist and neuropsychiatrist, Head of the Neuropsychiatry Programme at the National Institute of Neurology and Neurosurgery (INNN), Mexico. He holds a PhD in Sciences from the National Autonomous University of Mexico (UNAM). His research focuses on psychosis, catatonia, delirium and autoimmune encephalitis, integrating phenomenological psychopathology with cognitive neuropsychiatry. He has authored academic books dedicated to the clinical and scientific principles of neuropsychiatry, along with the clinical application of brain imaging. He received the National Literary Essay Award by the Institute of Fine Arts in Mexico.

Dr Rodolfo Solís-Vivanco, PhD
Cognitive neuroscientist and researcher at the National Institute of Neurology and Neurosurgery, Mexico, and professor at the National Autonomous University of Mexico (UNAM). He holds a PhD in Psychology and completed postdoctoral training in cognitive neuroscience at the Donders Institute, Radboud University. His research focuses on the neurophysiological mechanisms of attention and cognitive control, as well as electrophysiological and neuropsychological biomarkers of neurodegenerative and neuropsychiatric disorders.

Dr Tim Nicholson
Reader in Neuropsychiatry at King's College London, where he leads the Neuropsychiatry Research and Education Group. He is an Honorary Consultant Neuropsychiatrist at South London and Maudsley and King's College Hospital NHS Foundation Trusts. His clinical and research interests include functional neurological disorders, immunopsychiatry and neuropsychiatric complications of COVID-19. He has led UK and international consensus recommendations on outcome measures for neuropsychiatric disorders. He co-founded the MSc in Clinical Neuropsychiatry at King's College London and is widely involved in neuropsychiatry training and education.
